Subject: Fwd: NAEP inclusion rates and Florida scores

Hi Michele and Karen,

I hope this email finds you doing well!

Can you tell me, or point me in the right direction, on what the FL inclusion policy is for NAEP and if it has changed over that last couple administrations.

Thanks,
Christy

Ladies-

Looking at the gory details of NAEP inclusion rates, I noticed that the 2011 NAEP inclusion numbers for Florida were commendably high (98% of all students on 4th grade reading, with the federal suggested minimum of 95% of all students) and the thought flashed across my mind that perhaps part of what happened in the 2011 drop was that Florida tightened their inclusion policies compared to previous years in response to the new guidelines.

I've tried to look at the 2009 NAEP reading report to see if this checks out, but thus far it doesn't look like the tables in the Appendix are precisely the same.

I'm wondering if this possibility has been explored within FIDoE.
