## DEPARTMENT OF EDUCATION

### [Lawmakers: Education law changes hurt minorities](#)

(Associated Press © 11/14/2011)

WASHINGTON (AP) — Minority lawmakers say proposals in Congress to rewrite the education law No Child Left Behind fail to protect minority and disabled students and those for whom English is a second language. Black, Hispanic and Asian Pacific American members of Congress say the law should include federal accountability standards, better data collection, graduation goals and improved opportunit...

[Dental school plans withdrawn](#)  
(Central Florida Future © 11/14/2011)

The UCF administration has withdrawn its proposal for a dental school after meeting opposition from the state university system's Board of Governors. The proposal, which was initially turned down by the Board of Governors this past September, was revised and to be voted upon last week. On Nov. 8, however, UCF revoked its dental school plans. "We have asked that the Board of Governors withdraw ...

#### [Fight attrition in STEM field](#)

(Central Florida Future © 11/14/2011)

Florida's public universities have decided to engage in a robust debate during the next two months over how to increase the number of graduates in high-tech fields, according to the Orlando Sentinel. Several proposals are being considered, such as asking the state to change its Bright Futures program to steer more money toward science, technology, engineering and math majors. One particular prop...

#### [Laura Bush believes in the importance of education](#)

(Charleston Gazette © 11/14/2011)

CHARLESTON, W.Va. – Many little boys and girls dream of being the president or first lady (or maybe even the future first man). Is it really as luxurious as it seems, though? Sure, they get to live in a big white house, but the job is tough. Former First Lady Laura Bush was in Charleston on Wednesday for the West Virginia Education Alliance annual dinner at the Clay Center. I had the honor of...

#### [Tough Questions on Changing Teacher Evaluations](#)

(Chicago Tribune © 11/14/2011)

For the first time next year, thousands of Chicago Public Schools teachers will be evaluated based partly on how well their students are doing academically. Many fear they will face dismissal if the standards are not applied fairly. "It's going to make people really angry," said Ruth Resnick, a librarian at O'Keefe Elementary School, who spoke last week at a public forum about carrying out a n...

---

#### [China continues to fuel growth among international students](#)

(CommunityCollegeTimes © 11/14/2011)

International student enrollment in U.S. colleges and universities increased by 5 percent in 2010-11, according to the annual report from the Institute of International Education (IIE) released today. IIE's 2011 Open Doors counts 723,277 foreign students in the U.S., a record number, with once again students from China contributing the most to the increase. Nearly 158,000 Chinese students atten...

#### [Rough Path Seen for Senate's ESEA Bill](#)

(Education Week © 11/14/2011)

The prospects for a bipartisan, comprehensive rewrite of the Elementary and Secondary Education Act moving through Congress this session remain cloudy, even after a hearing on a bill that was intended to serve as a prerequisite for sending it to the floor of the U.S. Senate. During the Nov. 8 hearing before the Senate Health, Education, Labor, and Pensions Committee, Republicans continued to ex...

---

#### [Virtual Education Sees Shift to Accountability](#)

(Education Week/Digital Education Blog © 11/14/2011)

Virtual schooling is in the era of a fundamental shift in its development that should be embraced, not feared, said authors and sponsors of the 2011 version of the Keeping Pace annual report on virtual schooling here at the Virtual School Symposium in Indianapolis Thursday. While most virtual school advocates in the past may have focused on gaining exposure for their programs, they should shift...

### [Unsigned contract on school agenda](#)

(Florida Keys Keysnews © 11/14/2011)

Monroe County School Board policy requires that the board sign off on all contracts in excess of \$25,000. That didn't happen in the case of a contract for software that administrators started using in November 2010 - six months before the School Board approved the contract. The district racked up more than \$200,000 in charges between November 2010 and May 2011, when the board final...

---

### [Proposed FCAT changes could dramatically impact school grades](#)

(Florida Times-Union © 11/14/2011)

Proposed achievement levels for the Florida Comprehensive Assessment Test would dramatically change school grades in the state, potentially tripling the number of F schools while providing a more gradual increase in difficulty as students matriculate. The proposal would give Florida the most rigorous state exam in the country, said Duval County Public Schools Superintendent Ed Pratt-Dannals, who...

[Naples pension plan changes add up to \\$100 million savings over 30 years](#)

(Naples Daily News © 11/14/2011)

NAPLES — The savings — more than \$100 million over 30 years — is substantial. But while Naples officials said negotiated changes to the city's pensions plans will have that significant of an effect on the city's coffers, officials in Collier and Lee counties said the savings aren't the norm. Instead, local government officials said they haven't been as lucky as they tackle the ever-growing pensio...

### [A sensible solution to student-loan debt](#)

(Miami Herald © 11/12/2011)

The college class of 2010 now has a dubious distinction. Its graduates who had student loans owed a record-high average of \$25,250, up 5.2 percent from the previous year, according to a new report from the Project on Student Debt, a nonprofit advocacy group. Last month, President Obama announced a plan to make it a little easier for 1.6 million college graduates to repay their government loans, re...

### [On education, U.S. not Finland nor should it be](#)

(Miami Herald © 11/12/2011)

During the School Board's September meeting, I almost fell out of my chair when United Teachers of Dade President Karen Aronowitz lamented the fact that the U.S. public education system is not more like Finland's, which often ranks among the top nations in international student assessments. I don't think that it was a fair or constructive comparison. Such an apples-to-oranges ...

#### [Lake School Board rejects Leesburg land swap](#)

(Orlando Sentinel © 11/12/2011)

LEESBURG —School Board members turned down a deal this week to swap the former Dabney Elementary School property in Leesburg in exchange for the former Kristen Court apartment complex, a plot of undeveloped land once considered an eyesore. City Manager Jay Evans said the 5-acre property, located adjacent to Rimes Early Learning and Literacy Center in the northwest part of the city, would be...

#### [Even suspicion of sex abuse must be reported, Florida experts say in wake of Penn State scandal](#)

(Palm Beach Post © 11/12/2011)

As federal officials this week continue to investigate whether Penn State University failed to report incidents of alleged sexual abuse on campus as mandated by federal law, many child advocates in Florida are hailing a state statute that requires professionals such as school personnel, to report any suspicion of child abuse or neglect to law enforcement. But the law, which specifies teac...

#### [Schultz: Cheer, cheer for old, above-average Florida](#)

(Palm Beach Post © 11/12/2011)

If the Legislature tries any harder to run higher education in this state, Florida will have a university system as mediocre as the Legislature. Of all the things Florida needs to improve higher education, a new university in Polk County - about 50 miles east of Tampa - would be nowhere near the top of most peoples' lists. Unfortunately, a new university in Polk County is at the top of J.D. Alexa...

#### [Reaction is mixed to requiring online high school courses](#)

(Pensacola News Journal © 11/12/2011)

Many Florida high-school students choose to take online courses. Some do it to boost their grade point averages. Others might want to take courses not offered at their school. But this year, online classes are no longer a choice. They are a graduation requirement. Starting with this year's freshman class, students must take at least one virtual course in high school. The requirement is part of...

**P-cola News Journal**

**A new look on life**

**Programs offer independence to blind, visually impaired**

11:00 PM, Nov. 12, 2011

Written by Rebecca Ross

A private nonprofit organization that offers support and guidance to blind and visually impaired individuals. All services offered are free of charge.

Programs are funded in part by the Florida Department of Education, Division of Blind Services. Monetary donations are welcome.

» WHERE: 3107 N. Davis Highway.

» DETAILS: 477-2663 or [www.ibwest.org](http://www.ibwest.org).

When a pituitary tumor robbed Roy Allen of his sight in 2009, he thought his life was over.

"For a long time, I felt worthless," the 49-year-old Allentown resident said. "I couldn't do anything."

Allen, a big man with soft blue eyes, had been a farmer for most of his life. He was used to spending his time behind the wheel of his truck or on a tractor.

"After I lost my sight, I didn't know what to do with myself," he said. "It hurt my mom so bad to see me like that. She got on the internet and started searching."

His mother's worried sleuthing led to the Division of Blind Services. They put Allen in touch with Independence for the Blind of West Florida.

"That was the biggest blessing ever," he said, smiling. "They gave me my life back."

An independent life

Independence for the Blind is a private nonprofit agency that annually serves about 250 blind and visually impaired individuals of all ages in 10 counties.

It offers a wide range of programs, including independent living skills, computer and adaptive technology and vocational training. Instruction takes place in clients' homes or in the spacious C.W. Gemmill Learning Center on Davis Highway.

Most of the programs teach, or re-teach, the skills sighted individuals take for granted.

On a recent afternoon, a handful of adult clients gathered in a large meeting room at the Learning Center to practice money sorting. Those in the earlier stages of sight loss wore blindfolds, learning to identify currency by touch alone.

Instructor Micki Wiedbrauk offered encouragement as Daisy Hawkins sorted a pile of coins.

"Remember which coins have ridges," she said. "Quarters and dimes."

Executive Director Bruce Watson happily offers tours of the Learning Center, which opened in 2009.

"Before this, we were cubby-holed into two small leased properties," he said. "Here, we have room for our offices and training rooms."

There's a large kitchen, where clients learn cooking and food prep skills. There are three refrigerators and three stoves — all different models — along with dishwashers and microwaves.

A smaller staff kitchen contains a washer and dryer. Small "bump dots," placed in strategic spots, serve as reference points on dials and switches.

"They learn to use appliances like the ones they have at home," Watson said. "We want them to be comfortable and safe in their own kitchens."

Down the hall, another room contains computers and a Braille processor. Using voice-activated or text magnification software, clients become technologically savvy.

"The blind and visually impaired can use a computer keyboard like anyone else," Jason Grills, assistant tech supervisor, said. "The training takes about six months to a year, depending on the person."

Just a regular teen Parker Sington is one of the Independence for the Blind's younger clients.

The 17-year-old Pace High School junior has been mastering the JAWS screen reading software program, a program that translates text in to the spoken word, on his home computer, thanks to his instructor, Linda Eden.

Parker, an outgoing, straight-A student, is visually impaired. Damage to his occipital lobe, which occurred after birth, prevents his brain from processing what he sees.

"My eyes are fine," Parker said. "But that connection between my eyes and my brain doesn't really work."

His impairment doesn't slow him down, in any sense. Parker frequently ditches his white cane — which he hates — at home.

"I'm just a normal teenager," said the teen, who wants to be a radio personality like Brent Lane on Cat Country 98.7 FM, one day. "That's how I want people to see me."

Parker is among more than a dozen area teens involved in Independence for the Blind's transitional program. Classes focus on everything from social networking to renting that first apartment.

"We get them ready to graduate and go on to whatever they want to do," Watson said. "For some, that may be a job. For others, it's about becoming a functional adult."

A new vision Allen is a graduate of the center's adult daily living skills and computer training programs. He's regained his prized independence, taking care of himself — and his dog — in his Allentown home.

"I cook, clean, go online and do just about everything anyone else can do," he said, grinning. "I'm ready to get back to work, maybe in agricultural sales, or something like that. I just wish more employers understood what I'm capable of."

Allen still returns to the Gemmill Learning Center, but this time, as a willing guinea pig. Currently, he's taking part in a unique research study that might result in life-changing technology for the blind and visually impaired.

Wearing a pair of glasses containing a tiny camera, Allen scans a variety of high-contrast objects, or text. Electrical impulses from the camera vibrate a small pad that Allen holds in his mouth.

"I can feel the letters, or shape of the objects, on my tongue," he said. "It's really neat."

And it's just one more blessing that Independence for the Blind has given him, Allen says.

"It's a wonderful place, and the people couldn't be any nicer," he said. "Everyone should know about all the good they do."
