Thank you! Do you ever work with Lavan/Ruth? If not, I guess we will need to stay in touch via FB. ☺

Christy,

Happy New Year! I have recently transitioned to a new position with EIAS (Lavan's office). I am copying Andre so he can provide you with a timeframe for the EDW to update this report.

Hi Tammy,

What would it take to get this chart updated with the most recent year of data?

I hope you are doing well!

Thank you,
Christy

I see. It's not something I use every day, but I do refer to it when public/press ask me about results of rigorous standards on college remediation. I think as discussions about raising standards get more attention, data like this would be good to have. Let's put it on the low priority list for now.

Hi Mary Laura and Jaryn,

I tried tracking this down last year. The FLDOE was not really willing to redo this analysis for us. This data is not something they typically run, but did it for the Council of 100 back in 2009.

We can ask again if FLDOE will run it, so let me know if you would like me too. But, I know they have been very reluctant to do data runs because they are so short staffed.

Thank you,
Christy

Christy,

The original report we ran for the Council is attached. If you subtract the number of "UNKNOWN" from the number of Graduates, and then divide the number in the "NOT READY" column by the new graduate number it comes out to the percentages displayed below.

Could you share what you all sent to the council 100 previously.

I honestly thought this chart came straight from an OPPAGA analysis report but I am unable to locate it. And, I think Birnholtz was at OPPAGA then, I just cannot piece this together.

Christy,

I noticed that the numbers below in the chart did not match what we sent to the Council 100 in 2009. It appears the Council did some additional analysis on the data we provided to them and backed out the "UNKNOWN" students from the total Grads (denominator) and calculated the % needing remediation displayed in their chart below.

Hi Andre and Tammy,

After looking at the data in the chart, it did not make sense. I think these data are measuring something different. Will you take a look at the chart I included in the excel workbook and see if it makes sense to you.

Thank you,
Christy

Christy,

You can find attached the data requested below. Please note that the 2009-10 data is preliminary at this time.

Hi Tammy and Andre,

Do you all have updated stats on this chart?

Thank you,
Christy

Hi Adam –

While our chart looks different (see below), the numbers are the same as yours. The data came from DOE who ran a query on the PK-20 Data Warehouse in August 2009.

Best,

Steven

Steven,

I believe we got slide 34 from you during your research for Closing the Talent Gap. Do you remember where you got the numbers from?

Thanks!

Adam Peshek

Adam, I thought we got the data from the Council of 100 report. Maybe you could ask Steve Birnholz where he got the data.

I thought they just asked Heather Sherry or someone like that at DOE.

34 is from an OPPAGA report and there is no way to easily replicate their work based on data on the websites for CC, BOR, and ICUF.

Perhaps we could ask OPPAGA to provide a report update? Let me know what you think.

Thanks, Christy. We need to update slide 34 on this (and then add to main template) whenever you get a chance.

Angie,

Attached is the ppt I'll use Friday. Do I need to bring copies? Will you have this pre-loaded or do I need to bring a copy on a zip drive?

Jaryn,

Will you please let Dan Lips know about this, so he can come and listen to me present again before he works on version 2 of the Florida story.

Thanks all,

Patricia

Please email me your powerpoint once it is ready. I'll ask Kate to send us Katie's presentation as well.

Thanks.

Angie
