Subject: RE: Response - enrollment projections and gd 3

Sorry I skipped the discussion. I hit the wall about 2:30 and had to go home. This chemotherapy has me with strange sleeping patterns and other side effects that make it hard to finish a day at the office. I guess that's why I work from the house many different hours of the day, sometimes beginning at 4 AM, other times ending at 11PM.

If what they provide as a strategy doesn't make sense, send me an email at gldukesjr@comcast.net. My cell is 850-556-4708.

Christy,

Is there a time that we could talk on Monday or Tuesday to walk through the cohort approach you described in your email to look at third grade progression. We want to flesh out the data we would provide and the approach we would use to make sure that we will be getting you the information you need.

It looks like 10:00, 1:00 or 3:00 on Monday or 9:00, 11:00 or 3:00 on Tuesday could work for us.

Let me know what would work for you.

Thanks,

Jane
