Yes, the table below is accurate. 2011 rule is based on simulation results after Board action, correct?

Thanks,

Jane

Subject: school grade numbers

Can you please verify these numbers? I used actual 2011 school grade numbers (not just the schools that would change under the new rule). As a result, there is a difference of about 17 schools between the numbers, which corresponds to 17 new schools being graded under the rule.

School Grades

Grade	2011 Actual	2011 Rule	Maximum of 1 Letter Grade Drop
A	1636	1086	1086
B	684	544	780
C	537	850	640
D	143	357	400
F	38	200	131
