

Which Sectors of America's Criminal Justice System Are Run by Private Companies?

Today, private companies hold contracts that allow them to profit off all corners of America's criminal justice system. Consequently, many people charged with crimes are exposed to the profit-seeking of companies every step of the way, from entering the system to being released. This graphic depicts the possible paths of someone who is charged with and found guilty of a felony, revealing the various privatized services provided by the corrections industry.

Private Corrections Industry Leaders

Correctional Facility Operators
